

Mirrors Led

RONDO, OKO and TAFLA LED are decorative and functional lighting concepts, doubling as provocative wall mirror-sculptures. Dedicated LED panels are positioned behind the mirrors, imparting an entirely new dimension to their reflections. Adjustable LED light panels are available in various colour versions and intensities. The light flash is two-sided, enhancing the narrative of potential reflections in deformed steel.

PROFILE LED
aluminium, PMMA

CONTROL
TUYA, remote control

CCT
2700 K-6500 K CRI \geq 90

LUMEN
2700 K - 6500 K: 97
