MUUTO

Halves Coffee Table in terrazzo

The new Halves Coffee Table, by Toronto-based MSDS Studio for Muuto, blends sculptural form with enduring materiality, creating a versatile statement for any setting. Crafted entirely from terrazzo, it offers a tactile, stone-like surface that is both durable and refined. Available in soft off-white or light taupe, the design harmonizes effortlessly with a wide range of interiors and outdoor spaces. Its geometric silhouette doubles as a playful display stand, uniting architectural presence with everyday functionality.

MSDS Studio is founded by Jessica Nakaniishi and Jonathan Sabine. Combining backgrounds in interior design and furniture-making, they create thoughtful, functional work that engages contemporary culture while adhering to the principles of good design and craftsmanship. Their multidisciplinary approach synthesizes material, form, space, and purpose into refined interiors, furniture, and lighting – designs that serve as a stimulating yet intimate interface between people and the built environment.

Please note: Halves Coffee Table will launch on January 15th.
